

LED Flashing Lights diam.100-200mm.

SolarFlash LED flashing lights have LED projectors with a diameter of 100/200mm, complying with standard UNI EN 12352 cl.2H/8H, inserted in single (200x200mm) or double (600x200mm) galvanised aluminium cases.

Thanks to their small size **SolarFlash** are available with 3 different power sources:

- Solar-powered kit composed of buffer batteries and a solar-powered 5-10-20 watt charger;
- Public lighting powered kit with buffer battery charger;
- 230VAC powered kit with direct connection to the 230V grid.

All **SolarFlash** models can be easily installed on any type of road traffic signage.
